## SUPERSCREENED

Revision Date  
DECEMBER 2016

### Rapid-setting Levelling & Smoothing Underlayment Compound

#### Product Description

**TAL Superscreed** is a grey single-component high-performance levelling and smoothing underlayment manufactured from rapid-setting shrinkage-compensated cement and selected aggregates formulated for rectifying and smoothing imperfections in floor surfaces.

Trowel-applied, it is designed to produce a smooth, hard wearing surface suitable for fixing all floor coverings including semi and fully flexible vinyl tiles and sheeting, carpeting, ceramic tiles, rubber and wood flooring.

**TAL Screedbinder** should replace the water in the mix when **TAL Superscreed** is applied in high traffic areas, commercial installations where rubber caster wheels form the majority of the traffic, all exterior/exposed areas, 'wet' areas, where building movement is expected, and where thermal expansion and contraction is expected (ie under tile heating).

**It is imperative that the water : powder ratio is strictly adhered to.**

**Note : This product is designed for the above mentioned application only. TAL will not be liable for misuse or adulteration of the product.**

#### Laboratory Test Data

Type	Modified Cementitious Underlayment
Colour	Grey
Setting Type	Rapid setting
Pot life*	1 Hour 15 Minutes
Open Time* (Working Time After Mixing)	20 – 30 Minutes
Initial Set*	Minimum 2 Hours
Trafficable ( <i>light</i> ) After*	3 Hours
Floor Covering Installation*	After 24 Hours, depending on application thickness and ambient conditions
Compressive Strength (28 Days)	≥ 25MPa
Flexural Strength (28 Days)	≥ 4 MPa
Mixing Water Temperature	15°C - 25°C
Application Temperature Range (Ambient)	+ 10°C - +30°C
Slab Temperature	+ 10°C - +30°C
Temperature Resistance	+ 5°C - +60°C
Mixing Ratio	20kg / 5L
Min Application Thickness	Featheredge
Max Application Thickness	12mm
Density	1.8
Pack Size	20kg

\*At 25°C and 50% relative humidity.

The above data was obtained under Laboratory conditions using freshly manufactured material. Actual results in the field will vary as a result of factors such as Ambient Temperatures, Site Conditions, etc.

#### Classification According to EN13813

**TAL Superscreed** is classified as a polymer-modified CT-C25-F4 screed (cementitious screed (CT) with a compressive strength (C) of minimum 25 N/mm<sup>2</sup> (MPa) and a flexural strength (F) of minimum 4 N/mm<sup>2</sup> (MPa)).

When mixed with **TAL Screedbinder** as a total water replacement **TAL Superscreed** is classified as polymer-modified CT-C30-F6 screed (cementitious screed (CT) with a compressive strength (C) of minimum 30 N/mm<sup>2</sup> (MPa) and a flexural strength (F) of minimum 6 N/mm<sup>2</sup> (MPa)).

#### Volatile Organic Content

VOC = 2 g/L

#### Packaging

20kg bags.

**Maximum water content: 5L per bag.**

#### Approximate Coverage

1.8kg/m<sup>2</sup>/1mm thickness (ie a 20kg bag will cover approximately 3.7m<sup>2</sup> at a 3mm build).

Actual coverages will be determined by site conditions, workmanship, etc.

#### Shelf Life & Storage

12 months from date of manufacture when stored in dry internal conditions between 10°C and 30°C and out of direct sunlight. **To protect from damp never store directly on a concrete floor.**

#### Installation / Health & Safety

This product is for industrial use only by trained operatives. It is potentially hazardous if not used correctly.

**Please refer to the Method Statement (MS) and Material Safety Data Sheet (MSDS) prior to the purchase and use of this product.**
